### 22. You are encouraged to comment further on the effectiveness of the instructor.: Howard Han

- He is a great professor, wish they were all like him
- If you don't understand he helps you step by step
- Professor Han is one of the absolute best professors I have had. I have thoroughly enjoyed my time in class from the; assignments, quizzes, tests, labs and lectures. He is extremely organized and prepared for class every single time. He speaks clearly, is consistently moving the class along while simultaneously checking in to make sure we all have an understanding as we go. I am impressed every time I attend lab and lecture. Before the course started this semester, I was nervous and anxious that I would not have an understanding of Chemistry, however when I attended the first class, I realized that everything would be okay. Professor Han explained what we would be working on this semester and how he will be available to help us along the way. His friendly and professional demeanor has made his class one of my favorite classes. I have recommended his class to family and friends. As I continue to learn from Professor Han, I look forward to every class confidently that I will be able to grasp concepts due to his explanations and patience. Professor Han truly has a gift for teaching, he is passionate about his work and it shines every time we all listen to his labs and lectures. I hope he stays at Ventura College for years to come!
- Great professor, always the quickest to respond to emails.
- I believe that he needs to be more prepared when it comes to uploading assignments on more than one occasion as quiz was not uploaded in a timely manner or a lab report was not done in a way that could be submitted. I also feel that he speeds through information and I didn't gain much from this class.
- Would definitely take again in the future if I got the chance. Always willing to help and explain things in chemistry and knows a lot about the subject. One thing that stood out to me about Mr. Han was that he has actual real-life experience in his field and knows what he is teaching. Overall amazing professor.
- Professor Han is very clear and thorough when lecturing. He is always available to answer questions during class and outside of class.
- Great professor who is understanding and flexiable
