- He conveys the materials in a way that is easy and interesting and creates a stress free class.
- he explains very well and is very patient
- Professor Han does a great job explaining the material and will take time when the class is struggling on a certain topic. He delayed a quiz once to make sure that everyone could have the material memorized and so we could go over the chapter more. He lets the class know what we should and shouldn't memorize and always records his lectures. Professor Han also posts his lecture slides on Canvas so students can review the chapters.
- He's a great instructor, I like his class. I hope to have him again the next semester
- Makes chemistry very understandable and their help in explaining the course material in detail makes it easier to remember things.
- Professor Han is able to explain and break a subject down and make it as easily understandable. I appreciate the fact that he is happy to help and teach you to get to the answer. Provides a friendly environment and feels like it is a conversation when he teaches versus presenting information in a bland way.
