

Howard Han

About Me

I have been teaching at Ventura College since 2023, after growing up in Korea until 2002 and spending most of my life in the Orange County area. My background includes research in inorganic chemistry, such as nano-prisms for solar panels and mesoporous silicon nanoparticles for drug delivery. I view teaching as preparing the environment and providing guidance, knowing that real learning happens within the student. I look forward to seeing students explore new ideas, challenge themselves, and surprise even themselves with what they can achieve.

Education

- UC Santa Cruz **M.S.** in Chemistry
- UC Merced **B.S.** in Chemistry
- Concordia Univ. **Ed.S.** in Higher Ed.

Other Interests

- Bass guitar
- Painting (watercolor, acrylic, digital)
- Photography & videography
- Vinyl record collecting
- Video games
